Thanks Bruce. I will forward the first part of your update to Bert and Darcy as an update.

Yes, please do what you can to re-prioritize since the BA work takes priority at this point.

Douglas,

I'm planning to get the revised draft to Lucita early next week, hopefully Monday. We should be able to hash this out within the next two weeks, maybe sooner, but my experience with these projects is that unforeseen items pop up and need to be addressed.

I do have the State oversight due next week for South Dakota – PPA requirements. I had planned to complete the year-end tasks for 2015 before handing off to Chuck.

Hopefully I can address this next week – if not I'll let you know.

Plus we have a lot of work now coming in from the Uinta Basin. Finley (new permit), Petroglyph (area permit expansion & 20+ add wells), Ultra (various permitting actions – providing assistance to Bill as he has provided me with plenty of questions), Gasco (well conversion), and QEP (various permitting actions). Other operators have some on-going issues or actions, such as Crescent Point Energy, Koch, and Wind River.

My plan is to solicit Bill's help with Ultra and Petroglyph's well reviews, putting the other actions on-hold until I complete the BA draft.

Ok thanks.

By your second telework day on Friday, please provide me your projection for completing the next BA draft incorporating Lucita's comments so I can report out to Darcy by the end of this week.

If you have other UIC work this week that may compete for your time, please let me know ASAP.

Thanks,

Douglas

Subject: Episodic Telework

Douglas, to follow-up our discussion last week, I'm planning an episodic telework Thursday to work on the Dewey-Burdock ESA.
